Locations: Louisiana, Lafayette, Baton Rouge, New Orleans, Galliano

INTRODUCTION:

Many years ago I found a strong passion for areas in Cybersecurity such as Incident Response, Business Continuity Planning, Disaster Recovery Planning, and Intel Development. What I realized quickly is that I needed more worldly experience so I sought micro careers in various fields such as Medical, Energy, and Real Estate. After several years I developed a strong set of soft skills to complement my growing skills in Data Analytics and Open Source Intelligence (OSINT) and Imagery Intel adapted (IMINT). My current goal for 2022 is to develop a tool that blends data analytics with intel methodologies for smart dossier development using Python.

MOST RELEVANT EXPERIENCE:

JAN 2019-Present

Consultant/Intel Research, CyberTronic Solutions LLC.

- Dossier development and maintenance
- Ethical bounds respected and maintained
- Familiar with Department of Motor Vehicle records (License plates and other information requests), Court documents, public records, Freedom of Information Act requests, Background checks, and other common investigation tasks
- Various SOCK Puppets for OSINT work
- Internet deep search - Using various search engines and browser dev tools
- Primary toolbox:
<https://osintframework.com/>
- Data analytics (various tools)
- Client Relations, Service Level Agreements, Contracting, Reporting
- Manage and work with Informal Discord Communities

EDUCATION:

PRESENT

Real Estate Agent Licensed in the State of Louisiana

Louisiana Notary Student 2022

JUNE 2019
